INTERNSPARK FRONTEND DEVELOPER INTERNSHIP

Task 2: QuizHub
Interactive Quiz Application

Student name	Sahasra Preetam
Task-2	JavaScript Mini Project: QuizApp
Technologies	HTML5, CSS3, Bootstrap 5, JavaScript
Project folder	Internspark-Task-2-QuizApp

1. Objective

To develop a responsive, interactive quiz application using HTML, CSS, JavaScript, and Bootstrap. Users can choose a category and difficulty, answer multiple-choice questions, receive instant feedback, track progress, and view their final score.

2. Technologies Used

- HTML5 — page structure and quiz sections.
- CSS3 — visual styling, answer states, and responsive adjustments.
- Bootstrap 5.3.3 — responsive layout, form controls, and buttons.
- JavaScript — question data, DOM manipulation, event handling, answer validation, progress, and scoring.

3. Application Features

- 10 categories: Technology & Programming, Science, Mathematics & Aptitude, Engineering, English & Communication, General Knowledge, Sports, Entertainment, Business & Finance, and Nature & Environment.
- Easy, Medium, and Hard difficulty selection.
- Multiple-choice questions with instant correct/incorrect feedback.
- Progress bar and question counter.
- Score tracking and final percentage/result message.
- Retry and choose-another-quiz options.
- Responsive layout for desktop and mobile screens.

4. Project Files

File	Purpose
index.html	Contains category and difficulty selectors, question area, progress bar, results section, and references to CSS and JavaScript.
style.css	Defines the QuizHub theme, quiz card, answer states, progress bar, footer, and mobile styling.
script.js	Contains question data and logic for starting the quiz, checking answers, tracking score, showing results, and retrying.

5. Code Snippets

HTML — quiz setup controls

```
<select id="category" class="form-select mb-3">
    <option value="">Choose a category</option>
    <option value="technology">Technology & Programming</option>
    <option value="science">Science</option>
    <!-- Other categories -->
</select>
<select id="difficulty" class="form-select mb-4">
    <option value="easy">Easy</option>
    <option value="medium">Medium</option>
    <option value="hard">Hard</option>
</select>
<button id="start-btn" class="btn btn-primary w-100">Start Quiz</button>
```

JavaScript — filter questions by difficulty

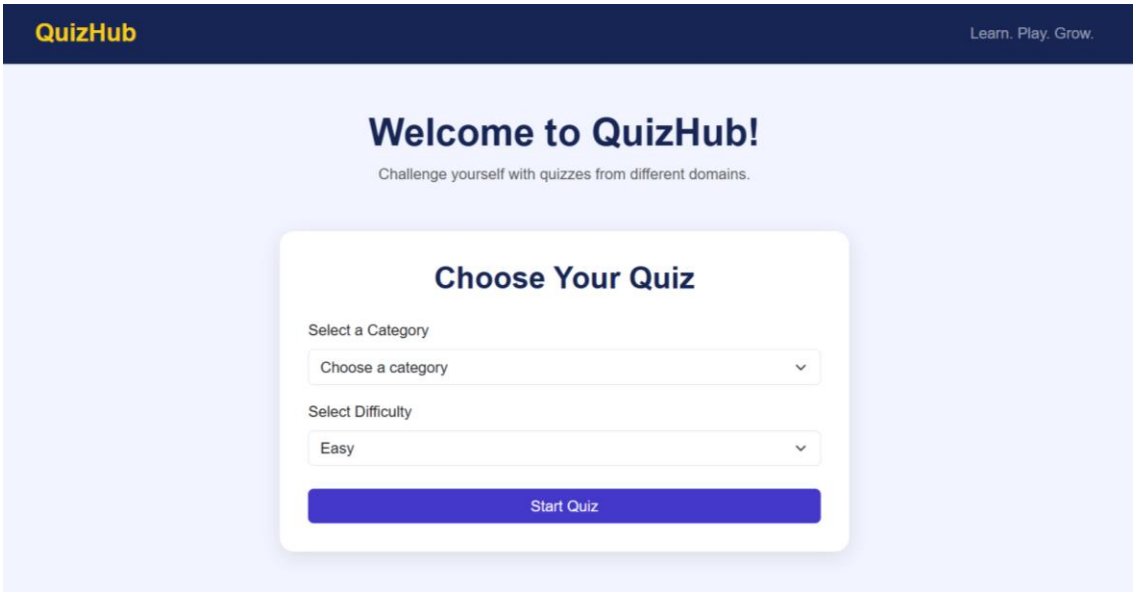

```
questions = questionBank[category].filter(
    question => question.level === level
);
currentQuestion = 0;
score = 0;
showQuestion();
```

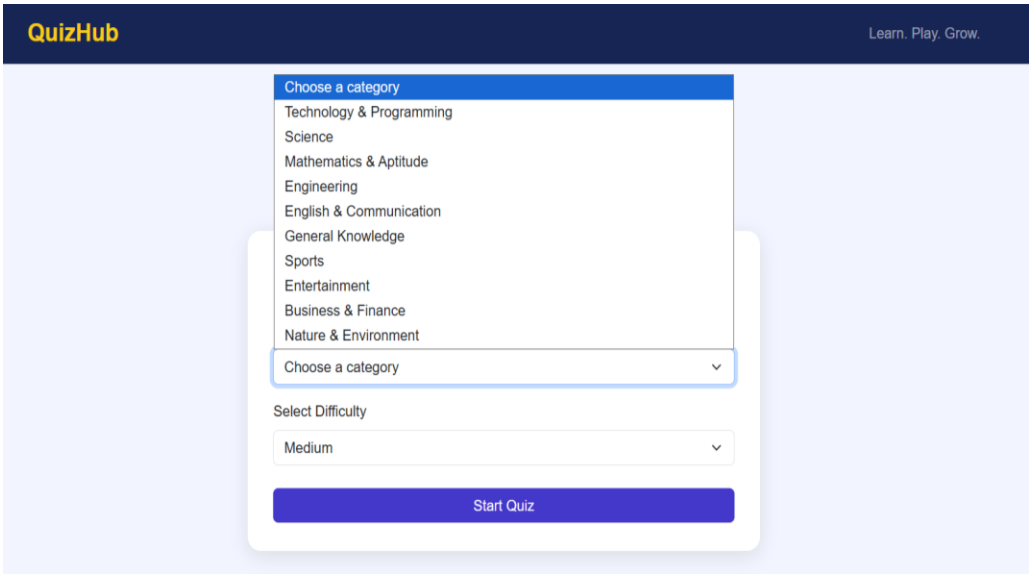

JavaScript — answer feedback and score

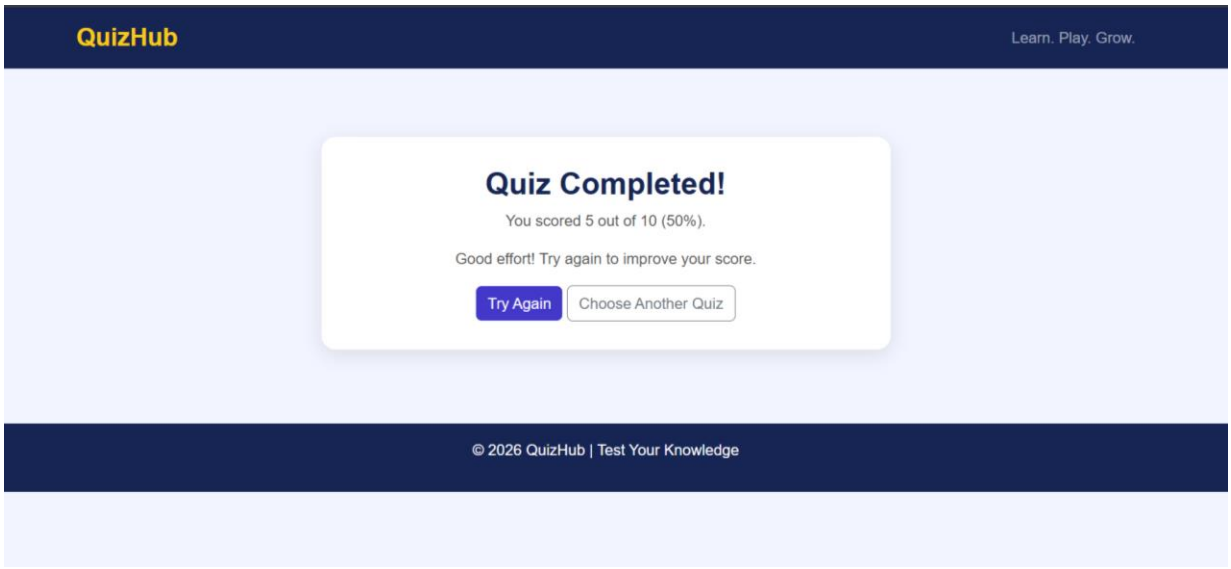

```
if (selected === question.a) {
    score++;
    feedback.textContent = "Correct! Well done!";
} else {
    feedback.textContent =
        `Incorrect. Correct answer: ${question.o[question.a]}`;
}
scoreText.textContent = `Score: ${score}`;
```

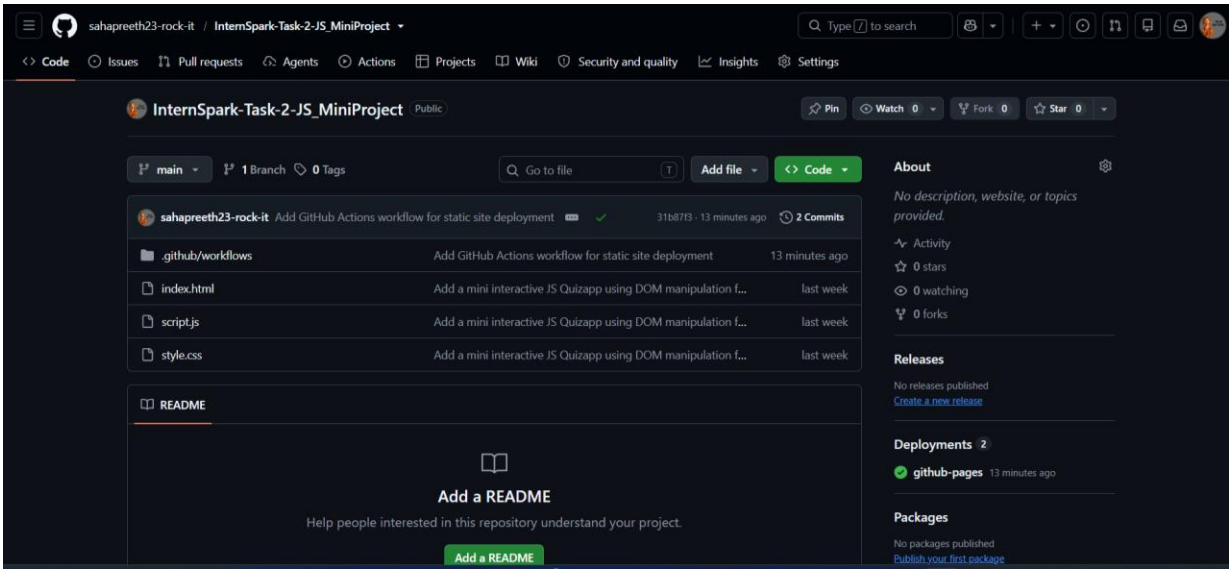

6. Screenshots

Insert real screenshots from the running application and GitHub repository in the spaces below.

7. Git Commands

Commands for committing and pushing the project:

```
git init
git add index.html style.css script.js
git commit -m "Add interactive QuizHub mini project"
git branch -M main
git remote -v
git push -u origin main

git remote set-url origin https://github.com/sahapreeth23-rock-it/InternSpark-Task-2-JS_MiniProject.git
```

8. Project Links

GitHub Repository: https://github.com/sahapreeth23-rock-it/InternSpark-Task-2-JS_MiniProject

Hosted Website (GitHub Pages): https://sahapreeth23-rock-it.github.io/InternSpark-Task-2-JS_MiniProject/

9. Testing Checklist

☐ Category selection is required before starting.

☐ Questions match the selected category and difficulty.

☐ An answer can be selected only once per question.

☐ Correct and incorrect answers show appropriate feedback.

☐ Score and progress bar update during the quiz.

☐ Results show the final score and percentage.

☐ Retry restarts the selected quiz.

☐ Choose Another Quiz returns to the setup screen.

☐ Desktop and mobile-sized layouts are checked.

10. Conclusion

QuizHub demonstrates JavaScript DOM manipulation and event handling in an interactive web application. It combines HTML, CSS, and Bootstrap to present categories, questions, answer feedback, progress, and results.
